#22 Comment on what the instructor does well (please be specific)

Really relating the topics to real life and having us work with all different kinds of media to show us that there is so much more to use to accomplish our goals and reach a broader range of people and topics. Being an IT class Professor Wolber does an amazing job relating everything together. I would definitely recommend this class to others.

Professor Wolber did a great job communicating the importance of technology in the public administration and nonprofit sector. He showed the class new and free ways to utilize the technical tools around us. This class is very realistic for every day tools I will most likely use in my work field. Professor Wolber was very helpful when it came to answering questions and properly showing us how to use different programs. His experience in the nonprofit field was very insightful and helped our class relate to him better. I also loved working with the Google plus community versus Blackboard. It worked synced with my email and was great for doing projects.

Presentations and helping students understand the material. Also, wants every student to succeed.

The projects were all good ideas and made me explore new things. He allowed extra time to complete projects and cared about students doing their best. His presentation skills are great!

He is a great teacher, knows all the material forward and back. He gives easy to understand presentations, and is very helpful with all assignments.

Thanks for helping me during this whole semester. I really appreciate your help.

Really receptive to students. Very helpful. Learned a lot of new things.

used tools to physically show us the new technology methods and how to use them

Professor Wolber is always willing to help students when they are having difficulty with assignments.

Professor Wolber did a great job explaining the projects we completed for class. Others along with myself did a lot of technical stuff in this class, which we have never done before, but found it perfect for our career field and helpful for the rest of our careers as GVSU students.

Professor Wolber does an excellent job with teaching this class! He made class interesting and helped us learn something new every week. He had us use our own mobile devices at times so that we could use the application discussed in class. I really appreciated this because I do well with hands on learning. He was always receptive to student input. He is an awesome professor and I would recommend him to anyone!

#23 Comment on what the instructor could do differently/better (please be specific)

Break down the step a little more, and provide a little more literature, maybe post his own lecture notes. Sometimes the powerpoints don't always get the most information across. If he included typed memos it might be easier to

N/A

Not every student is a techie. So sometimes my best work was graded lower than the effort I put in because I am not that great with some of the technology.

I felt he did grade a few assignments pretty harsh without a strict guideline around what was needed.

Classes were boring. Didn't require attendance. It's a 6-9-make class worth it or we won't show up.

explain more what he is looking for in assignments

Nothing-he does an awesome job!

Great class! I think everyone that is a Public or Nonprofit Administration major should take this class!

I think this should be an online course. Thanks professor!

I enjoyed this class and have recommended it to other students.
